LANGUAGES

- **Urdu:** Native / Mother tongue
- **English:** C1 (IELTS Academic 7.5, October 2026)

SKILLS

- **Programming:** C#, C++, Python, SQL, TypeScript
- **AI and data:** PyTorch, TensorFlow, computer vision, deep learning, reinforcement learning
- **Software and systems:** Unity, Git, Firebase, Photon Fusion
- **Specialised technologies:** AR Foundation, XR Interaction Toolkit, React Native, Blender

ABOUT ME

Associate Software Engineer at Mango Mango Games (sister company of Euphoria XR) and BS Computer Science graduate of UMT Lahore (CGPA 3.90/4.00). Three years of Unity and C# experience building mobile and XR games, real-time simulations and AI-driven gameplay, with a strong mathematics base and academic projects in computer vision, LSTM forecasting and reinforcement learning for game AI.

EDUCATION AND TRAINING

University of Management and Technology (UMT) — Lahore, Pakistan

Bachelor of Science in Computer Science

2022 - 2026 (degree completed 21/09/2026)

CGPA 3.90 / 4.00 | **Credit hours** 132 | **HEC attested**
Final year project Echoes of You, adaptive horror game with a Q-learning enemy AI (grade A)
Awards 3x Rector's Merit, 1x Dean's Merit | **Coursework** Artificial Intelligence, Computer Vision, Data Science, Data Mining, Deep Learning, Linear Algebra, Probability and Statistics, Calculus, Differential Equations, Numerical Analysis, Applied Physics

Govt. College University, Lahore (BISE Lahore) — Lahore, Pakistan

HSSC / FSc Pre-Engineering: 870 / 1100 marks, Grade A

2020 - 2022

The Punjab Boys High School (BISE Lahore) — Lahore, Pakistan

SSC / Matriculation (Science): 1058 / 1100 marks, Grade A+

2018 - 2020

WORK EXPERIENCE

Mango Mango Games — Lahore, Pakistan

Associate Software Engineer (full-time, from Aug 2026); Junior Game Developer (part-time, Aug 2025 - Jul 2026)

Aug 2025 - Present | sister company of Euphoria XR

- Build and ship commercial and client games in Unity 6 and C#, including Lion Simulator, Warpath: Dark OPS and client work such as Chatfam, Golf and Duck Race, with a focus on gameplay, progression and monetisation.
- Own gameplay and systems end to end: character controllers, NavMesh AI, wave and progression systems, spline-based track tools, ad and in-app purchase integration (AppLovin MAX, Unity IAP), and mobile optimisation with pooling and GameAnalytics funnels.

Euphoria XR — Lahore, Pakistan

AR/VR Developer (part-time, Nov 2024 - Jul 2025); Unity Developer Intern (Aug - Oct 2024)

Aug 2024 - Jul 2025

- Embedded a Unity runtime in a React Native app (Android and iOS) with two-way JSON messaging; Employee of the Month for this work.
- Developed VR applications for Meta Quest 3 using Unity XR plugins and the VR Interaction Framework, focusing on performance, controller mapping and spatial UI.

tecHouse Games — Lahore, Pakistan

Game Development Intern

Jul 2023 - Aug 2023

- Built character controls and integrated UI and UX elements in Unity.

Compscious — Lahore, Pakistan

Data Annotator (freelance, part-time)

Mar 2021 - Nov 2021

- Annotated highway camera footage from Germany to train computer vision models, an early introduction to AI data pipelines.

HONOURS AND AWARDS

- 1st Place, Game Development, GIKI SoftCom ’26 (national, Dec 2025)
- 5th Place, Google AI Seekho 2026 Hackathon, Lahore region
- Employee of the Month, Euphoria XR (2025)
- Three-time Rector’s Merit Award and Dean’s Merit Award, UMT (2022 - 2026)

LEADERSHIP

- **Founding Game Development Lead (2024 - 2026), now Mentor**, Google Developer Group on Campus, UMT, Aug 2024 - Present
- **Vice President**, Computer Science Society, UMT, Aug 2025 - Aug 2026
- **Computer Science Teacher (Grades 9 and 10)**, Avenir Academy, Lahore, Feb 2024 - Nov 2024
- **Peer Tutor, Computer Science**, UMT, Feb 2025 - Jun 2025

PROJECTS

Over The Top: One-Button Physics Runner (1st place, GIKI SoftCom ’26 Game Development)

Unity 6, C#, URP 2D, 2D Physics | Portfolio page

- Lead gameplay programmer and systems designer: built a single-button motor state machine (run, aim, grapple, reel, release) with bullet-time aiming at 15% time scale and pendulum slingshot physics, in under 48 hours.
- Engineered altitude-based gravity scaling, Perlin-noise hazards and a custom audio framework with editor tooling; worked with a UI/UX artist.

THRESHOLD: Agentic AI Top-Down Shooter (Google AI Seekho 2026, 5th place regionally)

Unity 6, C#, Gemini, Groq, NVIDIA NIM | Portfolio page

- Built a five-agent LLM pipeline (director, level generation, quality control, NPC brain, rewards) that adapts difficulty and dungeon layout to each player, with local fallbacks when AI is unavailable.

Echoes of You: Adaptive Psychological Survival Horror (final year project, 2026)

Unity 6, C#, Q-learning, NavMesh, Blender | Portfolio page

- Lead Unity developer in a three-student team. Built a Q-learning enemy brain with a decaying habit tracker so monsters learn the player’s favourite hiding spots.

Chatfam: 3D Family Chat App (Mango Mango Games client project, live on App Store and Play Store)

Unity, C#, Python, OpenAI, AWS, PlayFab | App Store

- Developed, produced and released the full app for a client over 3 to 4 months: 3D family characters, room customisation, login and an AI chat system.

ADDITIONAL PROJECTS

Lightweight Object Detection for AR: YOLOv8 with SE Attention | academic research paper, 2026
0.448 mAP@0.50 against 0.438 for the baseline, matching YOLOv8-Small with 71% fewer parameters.

Drought Prediction System: Satellite Data and LSTM | CS456, team of four, 2025
MODIS and CHIRPS data into a three-layer LSTM with five drought severity classes. Demo video

Lion Simulator | Simulation, Mango Mango Games
Lead gameplay programmer: lock-on combat, prey AI and chapter missions. Portfolio page

Warpath: Dark OPS | RTS, Mango Mango Games, iOS
AI decision-tree enemy factions; built the player tutorial. App Store

Chess Run | Educational runner, Mango Mango Games, iOS
Chess piece rules meet an endless runner. App Store

Water Sort: Color Puzzle Game | Puzzle, Mango Mango Games, Android and WebGL
Core gameplay, JSON level editor, Hisavana ad mediation. itch.io

Golf | Mango Mango Games client project
WebGL golf with Solana and Firebase Cloud Functions. Portfolio page

Duck Race | Mango Mango Games client project
Solo-built 16-player racing with Photon Fusion and Firebase. Portfolio page
